Biological:

descriptors used to categorize human groups, behaviors and achievement linked to phenotype and genetic markers.

Geo-Political:

National/ Local legal definitions designed to create categories of human beings in order monitor and manage human groups.

Econ-Political

descriptors, designations and categories of people designed to explain inequity, rationing, limiting access to goods, jobs, services and money.

How might a shift in the definition of race change how we handle race relations?

How many races?
List the Human Races.

Truth about RACE:

1. Race is a modern idea.
2. Race has no genetic basis.
3. Human subspecies don't exist. t genetically similar of all species.
4. Skin color really is only skin deep.
5. Most variation is within, not between, "races."
6. Slavery predates race.
7. Race and freedom evolved together.
8. Race justified social inequalities as natural.
9. Race isn't biological, but racism is still real.
10. Colorblindness will not end racism.

What is RACE?
Simply put, RACE places a dollar value on a human life.

When did you first become aware of human differences based on race, ethnicity or gender roles?

What is your racial group?

What is your cultural group?

Who was able to interpret this awareness for you?

Does society hold higher value for different groups? Why or why not?

INFORMING CHANGE

When you were a child who was helpful in teaching about being inclusive of all people?
